INTRODUCTION:

These simple & low cost coders are ideal for **Continuous Coding** on various packaging machines.

The message to be printed is very easily composed by just assembling the stereotypes (easily changeable) on to the print drum. The Inking system consists of a rechargeable circular cartridge, which is fully enclosed allowing the use of fast-drying & indelible solvent-based inks for porous and non-porous surfaces.

The whole assembly is directly mounted on the packaging machine with the supplied bracket & as the film passes over the roller of the bracket, it gets printed continuously.

FEATURES:

- Very simple and low cost coder to print continuously on tablet packs, labels, pouches, etc.
- Automatically takes the speed of the parent machine by friction. No power required.
- Complete bracket provided for easy installation on any make & model of Packaging Machine within 15 minutes.
