## UNIVERSAL HAND STAMPING SYSTEM - MODEL HSS

AIMS very low cost Universal Hand Stamping System which is a reliable hand-operated self-inking Batch Coder for manually coding **B.No., Mfg.Dt., Exp.Dt., M.R.P. Rs., Ingredients, Logos, etc.** in one stroke on flat / round, metallic / non-metallic surfaces on pouches, tins, caps, glazed or plain labels, laminated cartons, bottles (curvature), etc. **Model HSS-60-M.**

For the basic system, the grooved rubber stereotypes are push fitted into the grooved base mat to form the message of 3 to 5 lines. Then it can be inked manually on the inkpad & stamped onto the substrate to get a permanent printing.

**VIDEO: <https://youtu.be/N-OUsbLAYWU>**

For the plastic type Auto-Stamper, the grooved rubber stereotypes are push fitted into the grooved base mat to form the message. The inking cassette is loaded into the compartment & inks the stereotypes automatically after every print.

For the metallic type Universal Auto-Stamper, the grooved / flat stereotypes are composed onto the base mat to form the message. The stereotypes take the ink from the inking cassette & transfer the print onto the substrate.

### INTRODUCTION:

These **Manual Coding** kits are like mini printing shop in your office or factory. Make your own instant rubber stamps whenever you need it.

The message to be printed is very easily composed by just push fitting the grooved stereotypes (easily changeable) on to the groove base mat. The Inking system consists of a rechargeable felt pad, which is fully enclosed allowing the use of fast-drying & indelible solvent-based inks for porous and non-porous surfaces.

When you press on the handle, the print head slides outside for coding / printing onto the product & on release, rotates & slides back into the housing for inking.

### FEATURES:

- **Very low cost system** for small quantity printing or as standby for semi-automatic and automatic machines.
- Different models with plain & dot matrix (inkjet) stereotypes, manual inking / auto inking in Plastic or Metal & models for curvature printing.
- Can be used to print on all sizes & materials such as metal, glass, plastics & all types of packaging materials such as HDPE, LDPE, Cellophane, Aluminum, polypropylene (PP), paper, etc.
